DETAILED ACTION***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

i) Claims 2-21 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 22-40 of copending Application No. 10/361,976. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims encompass the addition of various types of aqueous alkaline hops acid solutions to fermentation media, including brewing and production of alcohol spirits, in order to avoid contamination by undesired microorganisms. Further, the recited method steps do not a patentable distinction between the two.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented. In the response of December 05, 2005, "applicants submit that this provisional rejection should be withdrawn in view of the fact that the application has not matured into a patent as of yet." This is not deemed persuasive, as this is a provisional obviousness-type double patenting rejection, which is proper at this juncture.

ii) Claims 2-21 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-25 of U.S. Patent No. 6,893,857. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims encompass the addition of various types of aqueous alkaline hops acid solutions to fermentation media, including brewing and production of alcohol spirits (which require the presence of sugar in the media for

fermentative growth of yeast), in order to avoid contamination by undesired microorganisms. Further, the recited method steps do not present a patentable distinction between the two.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented. In the response of December 05, 2005, applicant states that a terminal disclaimer will be filed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
